Github 🐙: moonpiedumplings • Website/🌐: moonpiedumplings.github.io

Summary

Avid user of Linux 🐧 and related technologies for 6 years, intimately familiar with them through personal projects, daily usage, and teaching others. Proficient in both operations, and technical writing/documentation.

I have a site where I document all my work, write about tech, and post guides for other to use: moonpiedumplings.github.io

Professional Experience

Internship at Cirrascale Cloud

Date: 7/10/2023 - 8/26/2023

- Installed and configured PFSense 🍷 on Proxmox
- Used packer to automate creation of a MAAS image that deploys Proxmox
- Documented K3's kubernetes, vcluster, and Kata-containers on Nvidia GPU's for machine learning operations
- Assisted in building physical servers 🖥, including doing tasks like installing storage 🗄, memory 🧠, or Nvidia GPU's

WUOTT — Behavioral Health Clinic

Date: 2016 - 2022

- General helpdesk and tech support
- Deployed Meshcentral on an Ubuntu 🐧 VPS using Docker Compose 🐳 so I could access, manage, and troubleshoot Windows 🖥 devices remotely

'\n* Managed a Wordpress site\n* Managed an email server\n'

Independent Organizations

President of Layer 8 Cybersecurity Club at Cal State Northridge

Date: Fall 2023 to Ongoing

CSUN competes in a cybersecurity competition, CCDC. Much of the work here is for that.

- Automated firewalls, backups, password shuffling and container management via Ansible
- Designed a reproducible development environment for Linux 🐧, Windows 🖥, and Mac 🍏 using Nix ❄
- Introduced and taught people Linux 🐧, concepts, and related software 🐳, >_, 📁, 📦, 🐳, 📦
- Did regular presentations, every Monday, on various cybersecurity, cloud, and devops topics
- Completed multiple NICE challenges, involving Linux 🐧, terminal >_, and database 📦 management. Wrote 5 Writeups to assist my teammates.
- Led the CCDC team to regionals as the Linux team lead, taking 7th out of 27 teams

Personal/Educational Projects

- Deployed a Minecraft 🎮 server using Podman to an Oracle Cloud VPS
- Built CI/CD Pipelines using GitHub 🐙 Actions and Docker 🐳, to deploy to an AWS 🐘 EC2 VPS, for a class project for AP CSP. Over 40 students utilized my pipelines for auto deployment
- Dockerized Node.js 🍃📄, Python 🐍, and Java ☕ applications
- Wrote technical documentation to assist students and teachers in AP CSP (E.g: [duckdns](#))
- Deployed Kasmweb on a highly performance optimized Ubuntu 🐧 VPS
- Deployed a point to site Wireguard VPN connection between my router and a VPS
- Installed OpenStack on Rocky 🐘 Linux 🐧 using Kolla-Ansible
- Deployed a Kubernetes cluster using FLuxCD (GitOps)
- Deployed Incus (Proxmox/ESXi alternative) with Single Sign on and Fine Grained Authentication to control what resources invited users had access to

Current personal projects can be found on [my website](#), where I document my work as go. I make it a point to pick challenges beyond my current ability. I don't always succeed, but I always grow in the process.

Education

The items in this section are in chronological order, from things I did first to things I did most recently.

- Cal State Northridge Computer Science BS — expected graduation 05/27
 - ☑ Introduction to Algorithms and Programming (COMP 110/L) ☕
 - ☑ Data Structures in Java (COMP 182/L) ☕
 - ☑ Calculus 2 (CALC 150B)
 - ☑ Computer Architecture (COMP 122)
 - ☑ Discrete Structures (COMP 256)
