SUMMARY

Avid user of Linux, Kubernetes, and other cloud native technologies, intimately familiar with them through work experience, personal projects, competitions, daily usage, and teaching others. Proficient in operations and technical documentation of cloud native systems.

EDUCATION

California State University, Northridge
Bachelor of Arts in Computer Science

Los Angeles, Ca
Aug. 2023 – May 2027

EXPERIENCE

DevOps Intern

June 2026 – August 2026

Osoosi Inc

San Diego, Ca

- Used Github CI/CD to automate deploy and updates of backend servers
- Migrated manually deployed databases to DBaaS, eliminating manual scaling and updating
- Wrote documentation for development environments so that team members could rapidly onboard themselves
- Integrated flight documents into a vector database, avoiding retraining

Layer 8 Cybersecurity Club President/Officer

May 2024 – Present

California State University, Northridge

Los Angeles, Ca

- 26+ users taking advantage of services deployed and maintained using Kubernetes and GitOps.
- Centralized authentication and SSO, with invites and RBAC for easy, secure onboarding of new users (Authentik)
- Proxmox/Incus/VMware ESX for offering virtual machines and networks for attack/defense and learning
- Browser based Kali desktops and Nvidia accelerated Jupyter notebooks, used for workshops (Coder)
- Ran twice weekly meetings, workshops, and lectures for members

Collegiate Cyber Defense Competition Team Captain/Competitor

May 2024 – Present

California State University, Northridge

Los Angeles, Ca

- Defended 20+ machines, in order to keep an environment online against professional red teamers
- Scripted incident response and security tasks on Windows and Linux using Ansible
- Led our team to regionals twice, taking 7th among 24+ other collegiate teams
- Automated onboarding of users via Nix

MLOps Intern

June 2023 – August 2023

Cirrascale Cloud

San Diego, Ca

- Deployed a virtualized firewall, controlling traffic flow between networks
- Enabled remote, one click automated installation of Proxmox using MAAS at no cost
- Deployed Rancher for RBAC and GUI operations of Kubernetes clusters
- Enabled multi-tenant k8s clusters using vCluster
- Built physical servers, installing storage, memory, and Nvidia GPU's

Helpdesk Support Technician

Sep. 2018 – Present

Healing Wells

San Diego, Ca

- Troubleshooted Windows technical issues, offering on call technical support
- Deployed MeshCentral, an open source MDM solution, enabling remote support
- Updated with the wordpress site scheduling and contact features, reducing need for calls

TECHNICAL SKILLS

Languages: Java, C#, Bash, Python, Go, SQL

CI/CD: GitHub Actions, Forgejo, Helm, FluxCD, ArgoCD

Linux: Red Hat (Rocky, Alma, etc), Debian, Ubuntu, Arch, NixOS, Alpine

Security: Secret Management (Sops), IAM/SSO (Authentik), RBAC, ReBAC (OpenFGA), Active Directory

Cloud: Kubernetes, Terraform, Docker/Podman, AWS, Incus/LXD, Proxmox, Openstack

Databases: Postgres, MySQL/Mariadb, Redis/Valkey
